PROFILE

Web developer and 2026 IT graduate from TIP Quezon City. As an intern at J-K Network Services, I built the company's inventory and asset management system on my own, from database to UI, and it's still in use today.

I also set up 19 employee workstations and handled daily IT support. I work with PHP, MySQL, and JavaScript, and I pick up new tools fast when a project needs them. I taught myself Unity to build my capstone game.

EXPERIENCE

Full Stack Developer / IT Support Intern

Jan 2026 – Apr 2026

J-K Network Services

- Built the company's internal inventory and IT asset management system on my own. I designed the MySQL database, wrote the PHP back end, and built the HTML/CSS interface. The system is still in use.
- The system centralizes IT asset and administrative records that were previously scattered across spreadsheets.
- Assembled, configured, and deployed 19 desktop workstations, including RAM/SSD upgrades, SSD reformatting, software installs, and cable management.
- Provided daily IT support to employees, fixing hardware faults, software errors, OS problems, and slow machines.
- Wrote technical documentation and designed print and digital materials for the company.

Freelance Data Management Assistant

Sep 2021 – Mar 2022

Alpha Iota — Malaysia (Remote)

- Set up and managed about 150 online platform accounts per day inside a secure virtual machine environment, following strict credential-handling procedures.
- Regularly finished my daily batch early and took on additional accounts to increase output.
- Entered each account into timed overnight queuing events and earned commission on successful results.

EDUCATION

Bachelor of Science in Information Technology

Graduated 2026

Technological Institute of the Philippines — Quezon City

SKILLS

Languages

PHP · JavaScript · TypeScript · Dart · C# · C++ · Python · SQL · HTML · CSS

Web Development

ReactJS · Node.js · MySQL · XAMPP

Mobile Development

Flutter · React Native · Expo · Material 3 · fl_chart

Game Development

Unity · Blender

Testing & AI

Jest · Claude API

Tools

Git/GitHub · Visual Studio Code · Figma

IT Support

Desktop assembly · Hardware & software troubleshooting · RAM/SSD upgrades · OS installation · Workstation setup

PROJECTS

MathPlusTBS — Unity Educational Game

Team lead · Capstone project — TIP

- Led the team and built most of the game myself, with no prior game development experience. I learned Unity during the project.
- Built the gameplay logic, 3D environments, and interactive features, and delivered a finished, playable game.

`Unity · C# · Blender`

Web-Based E-Commerce System

Team lead · 3rd-year project — TIP

- Built a full-stack online store for computers and electronics, including product listings, a shopping cart and checkout, and an admin panel.
- Coordinated tasks, deadlines, and testing for the team, and helped teammates get past coding problems.

`PHP · MySQL · JavaScript · HTML · CSS`

Workout Tracker — Flutter Fitness App 2026

Solo developer & designer · Personal project

- Designed in Figma and built an Android app for planning a weekly training split, logging workouts set by set, tracking progress with charts, and hitting daily nutrition targets.

`Flutter · Dart · Material 3 · fl_chart · Figma`

VoiceNote — Voice-First Notes App 2026

Solo developer · Personal project

- Built a mobile notes app where users speak their thoughts and an optional AI assistant (Claude API) summarizes them, suggests a title, and pulls out to-dos.
- Built it to learn TypeScript, React Native, and Expo outside my usual PHP stack, with unit tests in Jest.

`React Native · Expo · TypeScript · Node.js · Claude API · Jest`
