PROFESSIONAL SUMMARY

Recent BS Information Technology graduate with hands-on experience in full-stack development, IT support, database management, and hardware deployment. Independently designed and developed an internal Inventory & Asset Management System during my internship at J-K Network Services and configured 19 workstations for employee deployment. Experienced with PHP, MySQL, JavaScript, ReactJS, Python, C#, C++, and Unity, with a strong track record of independently learning new technologies and taking projects from concept to completion.

EDUCATION

Bachelor of Science in Information Technology

Technological Institute of the Philippines — Quezon City

Graduated 2026

TECHNICAL SKILLS

Web Development: PHP, MySQL, JavaScript, HTML, CSS, ReactJS, XAMPP, Visual Studio Code

Programming & Game Development: C#, C++, Unity, Blender

IT Support: Hardware troubleshooting, software troubleshooting, workstation setup, desktop assembly, SSD reformatting, RAM/SSD upgrades, cable management

EXPERIENCE

Full Stack Developer / IT Support Intern — J-K Network Services

- **Independently designed and developed an internal Inventory & Asset Management System**, handling the database structure, UI, back-end logic, and data-management functionality from end to end.
- Developed full-stack features using **PHP, MySQL, HTML, CSS, and XAMPP** to support internal IT operations and company record management.
- Provided hands-on IT support, diagnosing and resolving employee hardware, software, OS, device, and workstation performance issues.
- Assembled, upgraded, configured, and deployed **19 desktop workstations** for employee use, including RAM/SSD upgrades, SSD reformatting, software installation, and cable management.

- Supported additional company needs through technical documentation and digital/print design assets.

Freelancer

Alpha Iota — Malaysia | September 2021 – March 2022

- Managed and maintained company data across spreadsheets and digital systems.
- Verified information for accuracy, completeness, and consistency.
- Supported administrative operations, documentation, and digital record organization.
- Assisted with data handling and operational coordination tasks.

PROJECTS

Inventory & IT Asset Management System

Independently designed and developed a PHP/MySQL-based internal system for J-K Network Services to centralize IT asset and administrative data. Built the database architecture, user interface, back-end logic, and data-management functions.

MathPlusTBS — Unity Educational Game

Led and independently developed an educational game using Unity and C# despite having no prior game-development experience. Self-taught Unity during development and delivered a functional application involving gameplay logic, 3D assets, environment design, and interactive features.

Web-Based E-Commerce System

Developed a full-stack e-commerce website for computers and electronic devices, including product listings, front-end interfaces, database integration, and core purchasing functionality.

LEADERSHIP EXPERIENCE

- Led and supported multiple academic software-development teams from planning through final delivery.
- Coordinated task assignments, deadlines, testing, documentation, and presentations.
- Helped resolve technical blockers and coding issues to keep projects on schedule.
- Frequently took ownership of development work independently when additional execution was required.
